PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Remote)

11/2024 – 04/2025

Developed scalable web components and responsive frontends using React.js and Node.js backend services.
Collaborated to optimize REST APIs and improve database query performance.

Vizag

EDUCATION

B.Tech in Computer Science & Engineering (Artificial Intelligence)

06/2025 – Present

Pydah College of Engineering
CGPA: 8.65/10

Kakinada

Diploma in Computer Science Engineering (AIM)

06/2022 – 04/2025

Pydah College of Engineering
Percentage: 86.28%

Kakinada

TECHNICAL SKILLS

Languages

C, C++, Java, Python, JavaScript, SQL

Frontend

HTML5, CSS3, React.js

Backend & Databases

Node.js, Firebase, SQLite, REST APIs

AI & ML

Machine Learning, Generative AI, OpenAI APIs,
Vector Databases

Tools & Platforms

Git, GitHub, Firebase, Supabase

CERTIFICATIONS

- AWS Student Builder Program Participation
- SRUJANA 2026 Hackathon Participation

LEADERSHIP & ACHIEVEMENTS

- Technical Lead, AWS Student Builder Program
- Recipient of GitHub Student Developer Pack
- Runner-Up, College Level Hackathon Competition (CODESTORMS S-2)
- Participated in State-Level Hackathon Competition (SRUJANA 2026)

PROJECTS

CivicPulse AI: Full Stack AI-Powered Civic Complaint Platform

- Tech Stack: React, Node.js, Firebase, Gemini API, Google Maps API
- Developed a full-stack platform using Gemini API for multimodal AI classification of civic issues, achieving a 5% reduction in manual complaint routing time across the city.
- Engineered real-time spatial mapping with Google Maps API and a high-concurrency administrative analytics dashboard backed by Firebase database services.

Engineer360: AI-Powered Career Analytics Platform

- Tech Stack: React, Node.js, SQLite, REST APIs
- Built a software development engineer readiness platform utilizing React, Node.js, and SQLite to automatically evaluate student burnout risks and diagnose skill gaps.
- Implemented low-latency RESTful APIs and a persistent student history-tracking system to deliver personalized study guides.

VenkyOS: Personal Productivity Operating System

- Tech Stack: React, Supabase, JavaScript
- Engineered an offline-first productivity PWA in React and Supabase, implementing cross-device synchronization and custom task planning workflows.
- Integrated user consistency heatmaps, browser notification engines, and a custom CSV export system.
